

27 December 2007

Raytheon Corporation  
2000 E. El Segundo Blvd.  
El Segundo, CA 90245

To whom it may concern,

As a Raytheon employee for 18 years and now as a consultant, I have responsibility for developing advanced lasers and sensors for military applications. Our efforts have resulted in successful delivery of a number of devices to the U.S. Army.

A&V Engineering, Inc has been a key partner in our success. They have always delivered to specification and on time at fair cost. Their support has been particularly helpful and timely in the component design phase and in the inevitable modification period of prototype testing.

The A&V staff is conscientious and diligent and it is a pleasure to work with them.
